

## **NISP and ATLAS** **GIVING YOU MORE**

**NISP tenants enjoy FREE Unified Messaging with Atlas Communications and NISP**

**Atlas Communications and NISP are delighted to offer the latest in messaging services to NISP tenants. In addition to the services we provide, we are offering additional Unified Messaging**

**FREE OF CHARGE**

**Unified Messaging will provide you with ability to manage your messages more efficiently - be it your emails or voicemail.**

### **What is Unified Messaging?**

- Unified messaging is a technology that helps people better manage their messaging be it your voicemail or email.
- It enables you to view your emails and listen to your voicemail via your email account.
- The messaging server allows the unified messaging user to configure and control their messaging using a telephone user interface (TUI.)

### **Advantages of Unified Messaging.**

- Centralises your messages allowing the same amount of communications to be received, reviewed and responded to in less time.
- Voicemail messages can be played back and generated as email attachments.
- Speeds interactions between colleagues and clients.
- Improved employee efficiency and productivity.
